**AirForce Offers Big Bore Ammo**

## **AirForce Airguns Offers Big Bore Airgun Ammunition.**

*(Fort Worth, TX – April 26, 2017)* AirForce Airguns has announced that it will be offering ammunition for its industry leading Texan and TexanSS big bore air rifles. The ammunition will be available for all AirForce dealers. The ammunition is manufactured by Hunters' Supply to the specifications set by AirForce.

The introduction of the Texan big bore air rifle 2 years ago created an overnight demand for reliable big bore airgun ammunition.

“While we found that some of the custom ammunition performed amazingly well, we felt that we needed standard production ammunition to recommend to our customers,” commented AirForce CEO and Founder John McCaslin. “We found that the projectiles from Hunters' Supply performed consistently and reliably.”

The ammunition is cast lead and is available in all three Texan calibers - .457, .357 and .308. Within those calibers, there is a variety of projectile weights and designs to meet a variety of needs. As an example, in .457, there are multiple options ranging from a 143 grain round ball to a 405 grain flat point swaged projectile. The other calibers offer a similar assortment.

“We were pleasantly surprised at the selection of big bore airgun ammunition on the market,” remarked McCaslin. “When we were designing the Texan, ammo availability was a major concern. That is one of the reasons we are working with Hunters' Supply to bring this great ammo to market.”

“We will have the ammo in stock for our dealers to offer either for shelf stock or a specific customer,” added McCaslin. “Our dealer pricing assures that they can offer our products – now including ammo – at the best prices to their customers without sacrificing profit. This is our promise to our dealers.”

AirForce Airguns has been innovating, designing and producing precision pre-charged air guns at their Fort Worth, Texas headquarters for nearly 20 years. In 2016, AirForce opened a new state of the art factory in Texas to keep up with the growing demand and integrate the newest manufacturing techniques.

AirForce is known for developing the most technologically advanced airgun shooting systems in the world and is the original and favorite black airgun. With a reputation for flexibility and legendary accuracy, AirForce Airguns offers a solution for just about any airgun shooting situation.

Serious airgunning starts at AirForce Airguns.
