Hunters Supply

is Proud to Introduce

the Newest Technology:

Clear Slick Coat Bullet Lube

Hunters Supply always been known for consistence and the reason we only use virgin alloys.

Hunters Supply now features a specialized Clear Slick Powder coating which allows bullet to be shot at high velocities without using a gas check. This Clear Slick Coat has been tested in varies calibers above 2000 fps with no gas check needed, with a gas check added velocities have been achieved above 2600 fps.

Slick Coat produces less leading and smoke in the barrel at higher velocities. The consistency also prevents lube build up in the seating die at the reloading bench. This polymer creates a barrier to lead exposure. Has been tested with silencers in full-automatic with no fowling or lead build up. Enjoy more time shooting and less time cleaning.
